StU storage cabinet
with trays for
sterile units (StUs)

INFORMATION

6-2
EN

2017

StU storage cabinets of the B series are made of electrolytically galvanised and chromated thin sheet steel, surfaces are powder-coated. Choice of colours from the Becker Colour list. The technical cabinet details correspond to those in our "Fitted Furnishings" information brochure. The standard base height is 100 mm, doors are fitted with chromium-nickel steel bridge handles.

The cabinets have grid ledges onto which StU trays of AISI 304 (1.4301) chromium-nickel steel can be mounted – the 750 mm and 1100 mm wide cabinets have vertical partition walls. Up to 11 individual ½-StU containers can be stored in each compartment. The vertical position can be adjusted individually in 25 mm stages. At an additional cost, we also supply partition walls and grid ledges made of chromium-nickel steel. These cabinets are also available as series V "chromium-nickel steel" furniture.

Please state how many StU trays you require.
