BECKER

COLOURS

BECKER furniture is made to order for our customers. For model series -B- (powder-coated steel) you choose the colour for all front elements, such as doors and drawer fronts, using this colour palette.

Serial production coatings of bodies and bases are available in a choice of:

Pure white
RAL 9010

Grey white
RAL 9002

The standard body colour of mobile furnishing (items with castors) is Grey white, RAL 9002.

The standard coating is a high-quality powder coating with a gloss value of approx. 55 – 65 GU (satin-gloss) in accordance with ISO 2813 – measured at 60°. This provides good resistance against bumps and scratches, is easy to clean, withstands a wide range of disinfectants and ambient conditions.

Standard furniture handles are made of chromium-nickel steel.

Other colours, handles and gloss levels (matt approx. 15 - 25 GU / glossy approx. 80 - 95 GU) can be supplied at a surcharge.

* If you choose to order front elements in Cream (RAL 9001), we recommend ordering bodies and bases of the same colour (subject to an additional charge).

** Traces of wear and tear show up more clearly on dark surfaces.

If different colours are chosen for various elements, we recommend choosing the same gloss level.

Product colours may differ slightly from those shown on the chart due to printing processes.
